

The Science of Torah

At Brookhaven, 1010 Waltham Street in Lexington
Tuesdays, 9:30 - 10:30 AM, with Rabbis Lerner & Fel
November 21, 28, and December 5, and 12, 2017

Join Rabbis Fel and Lerner as they discuss how modern science further informs our understanding of the Torah and how scholars have dealt with tensions between the Hebrew Bible and our understanding of the world.

Topics will include Jewish views pertaining to dinosaurs, the origins of the world, an in depth analysis of the Garden of Eden, the global Flood, and evolution. This class takes place at Brookhaven, but is open to all members of the Temple Emunah community. *Please join us!*

ALSO: On **Tuesday, December 19th**, everyone is invited for a tour of The Harvard Museum of Natural History in Cambridge with Rabbis Lerner & Fel! We will leave from Temple Emunah at 9:30 AM, enjoy the museum and lunch together, and plan to arrive back at Temple Emunah around 2:00 PM. This outing is open to anyone; you do not need to attend the Brookhaven lectures to join us!

Please **RSVP** for this trip in advance to Rabbi Michael Fel: mfel@templeemunah.org. For questions regarding this class, or other Adult Ed opportunities, contact Linna Ettinger at AdultEd@templeemunah.org.
